

University of Novi Sad  
Faculty of Technical Sciences  
Computing and Control Department

To whom it may concern,

I was first acquainted with Aleksandar Stanković during his second year of studies at the Faculty of Technical Sciences in Novi Sad. He attended my course “Platforms for Object-Oriented Programming“ where he achieved a remarkably high grade (9 in scale 5-10) and has shown a great involvement in the class itself.

He mastered successfully all the concepts covered within the course, i.e. object-oriented programming using .NET platform, WPF technology for building rich desktop applications, as well as linking WPF applications with relational databases. His final project, as a main course assignment, has definitely shown his ability to convey difficult technical concepts while producing high quality results.

During the course he made significant progress and concluded the course with a full understanding of domain concepts, as well as particular programming methods and technologies. He has proved himself to be a smart, responsible and resourceful young person with high degree of intuition concerning object-oriented programming.

In summary Aleksandar Stanković shows all the characteristics necessary for him to achieve engineering excellence, and I enthusiastically recommend him as a promising candidate for your scholarship.

Yours sincerely,

Dr Goran Savić

Novi Sad, 07.10.2015.
